

Shaik Afnan

[Afghanistan-github](#) | [Afghanistan-linkedIn](#) | [Afghanistan-gmail](#) | [+91 8867375277](#)

SKILLS

- **Web Tech:** Java, MERN full stack JavaScript, MongoDB, RESTful API, Cloud Computing (AWS).
- **Languages:** Java, Python, Arduino, Spring, MySQL, JS, Latex.
- **Python Packages and Frameworks:** Scikit-Learn, Node.js, React, express, Matplotlib, Keras.
- **AI/ML:** Machine Learning, Deep Learning, Python, TensorFlow, PyTorch, Scikit-Learn, EDA

PROJECTS

OFFLINE-HUB (Offline Web App) - MERN STACK, JavaScript, API, Express.js [Link](#)

- Developed a robust offline web application in VS Code using HTML, CSS, JavaScript, JSON, and React. Integrated multiple utilities (Translator, Unit Converter, Budget Tracker, Color Converter, QR Code Generator) and games (Sudoku, UNO, Snake, Hangman), all accessible without internet.

Weather Detection and Analysis - Spring, React, JavaScript, Tailwind CSS, Weka ML [Link](#)

- Engineered a Spring Boot application in Eclipse to collect real-time weather data through APIs and process it with Weka ML models. Enabled accurate predictions of natural disasters like floods and hurricanes. Exposed data as RESTful APIs and visualized results for actionable insights. Focused on reliability and accuracy for better decision-making.

Face Recognition & Emotion Detection - OpenCV, MTCNN, DeepFace, TensorFlow [Link](#)

- Created a real-time system using Python, combining MTCNN for face detection, Facenet for face recognition, and DeepFace for emotion classification (happy, sad, angry, etc.). Handled multiple faces per frame, prevented duplicate detections, and provided real-time feedback via webcam. Leveraged deep learning and computer vision techniques to deliver reliable performance.

Smart Shopping Cart [Python, RFID, IoT, OpenCV, Arduino, Sensors] [Link](#)

- Designed an AI-powered smart shopping cart in Python, integrating RFID technology, computer vision with OpenCV, IoT sensors, and Arduino microcontrollers. Enabled automated product detection, billing, and real-time weight verification to enhance retail checkout efficiency and minimize errors.

EDUCATION

2025 - present	3rd Year CSE Student at MVJ COLLEGE OF ENGINEERING (CGPA: 9.1/10)
2018 - 2020	Class 12th at SDC IND PU COLLEGE- BANGARPET (Grade: 94.66/100)
2015 - 2017	Class 10th at THE JAIN INTL SCHOOL- BANGARPET (Grade : 74.87/100)

CERTIFICATIONS

• Java Certification (95.0%), IIT Bombay Spoken Tutorials	View Certificate
• Introduction to Cloud, IBM Developer Skills Network	View Certificate
• Programming in Java (81.50%), NPTEL Certification 12 weeks	View Certificate
• HTML Certification (82.50%), IIT Bombay Spoken Tutorials	View Certificate
• Prompt Engineering for Everyone, IBM Developer Skills Network	View Certificate
• State Level Hackaton Win , IOT Smart Shopping cart	View Certificate
