EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.E. CSE	MVJ College of Engineering	9.2/10	2021 – Present
Class 12	SDC IND PU College, Bangarpet	94.66%	2018 – 2020
Class 10	The Jain Intl School, Bangarpet	74.87%	2015 – 2017

EXPERIENCE

- Codec Technologies India**  Jun 2025 – Present
MERN Stack Developer Intern Bengaluru, India
 - Developed and deployed 5+ scalable full-stack features, improving system efficiency by 30% using MERN and Django REST
 - Integrated frontend and backend APIs for 10+ components, enhancing real-time performance and reducing latency by 40%
 - Collaborated in a hybrid agile team of 6+ engineers; contributed to code reviews, CI/CD pipelines, and sprint demos
- Cognifyz Technologies**  Mar 2025 – Jun 2025
Power BI Intern Bengaluru, India
 - Designed 10+ interactive Power BI dashboards, enabling data-driven decisions for internal operations
 - Automated reporting pipeline, reducing manual workload by 60% through ETL optimizations
 - Improved visualization clarity and responsiveness, increasing stakeholder satisfaction by 35%

PROJECTS

- OfflineHub - Offline Web App** 2023 
Tools: MERN Stack, React, Local Storage, REST API
 - Built 15+ offline tools (translator, QR generator, games) with 100% functionality using localStorage
 - Achieved 90%+ load performance even without internet access using caching and React optimization
 - Reached 500+ users across educational and offline communities
- Weather Detection System** 2023 
Tools: Spring Boot, React, IBM Datasets, GROK AI, REST API
 - Trained Weka ML models on 10,000+ data points to predict floods and hurricanes with 85% accuracy
 - Improved emergency alert generation time by 50% using Spring Boot + Histroical and forecast data
- Face & Emotion Recognition** 2022 
Tools: Python, OpenCV, DeepFace, MTCNN
 - Developed real-time emotion classifier with 95% precision across 4 classes (happy, sad, angry, neutral)
 - Optimized system to detect up to 8 faces simultaneously at 30 FPS using DeepFace and MTCNN
- Smart Shopping Cart** 2022 
Tools: Arduino, RFID, ESP32, HX711, WebHooks
 - Built RFID + load cell validation cart, reducing billing time by 70% and fraud by 90%
 - Integrated 4+ modules (LCD, buzzer, sensor) to deliver seamless checkout in <30s
 - Won 1st place among 100+ teams in state-level hackathon for retail innovation

SKILLS

- Programming Languages:** Java, Python, JavaScript (ES6+), TypeScript, C/C++ (Arduino IDE)
- Web Technologies:** Full-Stack Web Dev (MERN), REST APIs, JWT Auth, OAuth 2.0, GraphQL, WebSockets
- Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Django REST, Spring Boot, Tailwind CSS
- AI/ML:** Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV, DeepFace, YOLOv8
- Data & Cloud:** MongoDB, MySQL, Firebase, PostgreSQL, AWS EC2/S3, Azure, GCP
- Tools & Platforms:** Git, GitHub, Postman, VS Code, Jupyter, LaTeX, Power BI, Docker, Eclipse, Figma

CERTIFICATIONS

- Data Analytics** Deloitte Australia - Data Analytics Job Simulation 2025
- Java (95%)**, IIT Bombay Spoken Tutorials 2024
- Programming in Java (81.5%)**, NPTEL 2023
- Introduction to Cloud**, IBM Skills Network 2022
- Prompt Engineering**, IBM Skills Network 2022

ACHIEVEMENTS

- State Level Hackathon Winner - Smart Shopping Cart** 2025
